Charles C. Wolferth, Jr., MD Memorial Lecture

Based on your research, it seems that there is a mention of a “Point/Counterpoint” program dedicated to the patients who take care of each day. The program is associated with the American College of Surgeons, and it includes various speakers who share their perspectives on different topics related to surgery. The program is held in Baltimore, Maryland, from June 5-8, 2016. Please note that the full content of the presentation, including the speakers' biographies, is not provided in the image. For further details, you may need to access the conference booklet or the website mentioned in the image (www.pointcounterpoint-acs.com).
Buchman, past President of the Society of Critical Care Medicine, will be the featured guest lecturer on June 6. The topics for each day will cover the full spectrum of Acute Care Surgery. It will continue to have its trademark State-of-the-Art Lectures, with world renowned experts on that particular topic. This includes the Charles Wolferth, MD, who will present “The Evolving Specialty of Acute Care Surgery and the role of COT.”
