RE: Project #180124  
Trauma and mild TBI in a pediatric population: A pilot longitudinal descriptive study assessing post-concussive symptoms, functional and quality of life outcomes

Dear Dr. Biffi:

As noted in a previous letter to you, the initial project approval for Project 180124 has been granted. However, at the time of that letter, an appropriate RCHSD Research Administration review determination had not provided the HRPP with their review of this project, and the stamped, approved permission and assent forms could not be released.

The HRPP has been provided with an appropriate RCHSD Research Administration review determination, either Approved or Not-applicable, and the permission and assent forms associated with the initial project approval can now be released. You will receive your document(s) electronically. Should you have any questions, please contact the HRPP at 858-246-HRPP (858-246-4777).

On behalf of the UCSD Institutional Review Boards,

A handwritten signature in black ink, appearing to read "A Magit".
